BIOGRAPHY & OVERVIEW

Jonathan is Research Fellow in Bioethics and Medical Law in the Department of Law at the University of Manchester.

For his contributions to and achievements in research, Jonathan was awarded the Research Staff of the Year Award as part of the University of Manchester's Research Staff Excellence Awards 2023.

His research is cross-disciplinary, situated at the intersections of bioethics, philosophy, medical law, moral psychology, cognitive science, and health policy.

In the field of bioethics, Jonathan has published on the ethics of new and emerging biotechnologies, the ethics of biomedical research, the application of moral psychology, its theories, and concepts to clinical practice and health policy, and the rights of vulnerable individuals, children, and minority groups. He has also been heavily involved in establishing experimental bioethics (“[bioxphi](#)”)—a subdiscipline of experimental philosophy and empirical bioethics—as a specific field of research.

In medical law, Jonathan has published on experimental jurisprudence, the tensions between capacity law, mental health law, and human rights law, racial justice and drug laws, the regulation of biomedical research and new and emerging biotechnologies, international abortion legislation, physician assisted dying and euthanasia, and the roles of the Court of Protection and the High Court in cases involving vulnerable individuals and children.

Jonathan is Editor-in-Chief of [Clinical Ethics](#), member of the Editorial Board for [BMC Medical Ethics](#), and co-editor of the “Experimental Philosophy: Bioethics” section of [PhilPapers](#).

Jonathan is also a Research Collaborator in the [Oxford BioXphi Lab](#) (Uehiro Centre for Practical Ethics, University of Oxford), where he is part of a multidisciplinary team of scholars employing the methods of moral psychology, cognitive science, and experimental philosophy to contribute to substantive normative and philosophical debates in bioethics and medical law.

Jonathan is, currently, Co-Principal Investigator for the SwafS project, HYBRIDA (‘Embedding a Comprehensive Ethical Dimension to Organoid-based Research and Resulting Technologies’; SwafS-28-2020; Horizon 2020).

Jonathan conducted doctoral research in philosophy at Royal Holloway, University of London, where he was the recipient of a Crossland Scholarship and a College Research Scholarship,
